FRESH GULF COAST CATCH MATCH

Match your fresh catch with the correct name and description listed on the left by drawing a line from the description to the picture.

Flounder: Flounder are bottom-dwelling creatures which use their flattened shape and ability to change coloration and pattern on the eyed side of their bodies to partially burrow in the sediment, lie in ambush and wait for their prey.

Red Snapper: Red Snapper has a great, firm texture and a sweet, nutty flavor that lends itself very well to subtle herbs. Red Snapper makes for excellent grilling.

Yellow Fin Tuna: Yellowfins tend to school with fishes of the same size, including other species of tuna, and larger fish are often seen with porpoises, whales and whale sharks. Yellowfins eat other fish, crustaceans, and squid.

Grouper: Some grouper can grow very large: there have been reports of them growing big enough to swallow a human bather or even a scuba diver: for example, Arthur C. Clarke wrote that while scuba diving in an inlet on the coast of Sri Lanka he saw a grouper about 20 feet long, and 4 feet thick side to side, living in a sunken floating dock

Oyster: Oysters are low in food energy; one dozen raw oysters contain approximately 110 calories (0.460 kJ), and are rich in zinc, iron, calcium, and vitamin A. Fresh oysters must be alive just before consumption. There is a simple criterion: oysters must be tightly closed; oysters that are already open are dead and must be discarded. To confirm if an open oyster is dead, tap the shell.

Shrimp: To de-shell the shrimp, first hold onto the tail while gently removing the shell around the body. The tail can be detached completely at this point, or left attached for presentation purposes. The "vein" is then removed by making a shallow cut lengthwise down the outer curve of the shrimp's body, allowing one to pick out the dark ribbon-like vein with a pointed utensil.

Tic-Tac-Toe

One player is Xs and the other is Os.
 Take turns writing Xs and Os on the grid. Try to get 3 in a row while making sure that your opponent does not.
 Whoever gets 3 in a row WINS!
